

Student Exploration: Ray Tracing (Mirrors)

Essential Question: How do convex mirrors form images? How do concave mirrors form images?

Key Knowledge Questions: (You will fill these in using the Gizmo.)
For these questions, it is not the length of the answer that counts. It is your ability to think about the physics that you will be asked.

- Look at yourself in the front of the mirror. How do you see yourself? What do you see? (Think about the size and orientation.)

The front of a mirror is an example of a **convex mirror**.

- What do you see when you look at yourself in the back of a spoon? (Use a flat spoon if you have one.)

The back of a spoon is an example of a **convex mirror**.

Key Knowledge Question: How do concave mirrors form images?
For this question, it is not the length of the answer that counts. It is your ability to think about the physics that you will be asked.

Through your own observations, you can determine how a concave mirror forms an image. Use the Gizmo to explore how a concave mirror forms an image. (You will use the Gizmo to explore how a concave mirror forms an image.)

- Use the Gizmo to explore how a concave mirror forms an image. (You will use the Gizmo to explore how a concave mirror forms an image.)

Use the Gizmo to explore how a concave mirror forms an image. (You will use the Gizmo to explore how a concave mirror forms an image.)
